ORDER OF PUBLIC HEALTH MADISON & DANE COUNTY

DATE OF ORDER: JULY 1, 2020

Goes into effect on July 2, 2020 at 8:00 a.m.

EMERGENCY ORDER #7

This is a critical time for Dane County to minimize the spread of COVID-19, keep people healthy, and maintain a level of transmission that is manageable by healthcare and public health systems. Public Health Madison & Dane County (PHMDC) is using data and science to determine what actions are necessary across Dane County to slow the spread of the disease. As per the metrics indicated in Forward Dane, Dane County moved to Phase 2 on June 15, 2020. From June 20, 2020 through June 26, 2020, 482 individuals tested positive for COVID-19, which was the highest of any seven (7) day period. 59% of these cases involve individuals who are ages 20-29. 48% of the positive cases who were interviewed stated that they had attended a gathering, party or meeting with people from outside their household. 35% of the positive cases who were interviewed reported visiting a bar—representing the largest time and location-bound clusters of the epidemic so far. Accordingly, additional measures are necessary to prevent further outbreaks in similar environments.

An emerging pattern in Dane County confirms that bars and mass gatherings create particularly challenging environments for the COVID-19 pandemic. Physical movement within the establishment, duration of time spent in the establishment, and the degree of social mixing within individuals and groups are all greater in bars than in other businesses. Maintaining six feet of distance from people outside of one's own household is challenging in bar settings and mass gatherings. Louder environments and the cacophony of conversation that are typical in bar settings and mass gatherings often require raised voices and greater projection of oral emitted viral droplets. In their totality, these factors present a higher likelihood of transmission of the coronavirus within groups, between groups, and among the workforce.

Beyond higher risk of transmission in bar settings and mass gatherings, contact tracing, a key measure needed to control spread, is also more challenging in these settings. Undertaking contact tracing of a droplet-spread communicable disease based on exposure at a bar or mass gathering is extremely difficult because of the constant mixing among persons, including

unknowing prolonged and close contact. Based upon the foregoing, I, Janel Heinrich, Public Health Officer of Madison and Dane County, by the authority vested in me by the Laws of the State, including, but not limited to, Wis. Stats. Secs. 252.03(1), (2) and (4), order the following as necessary to prevent, suppress, and control the spread of COVID-19:
