

General Membership Meeting Agenda

Tuesday, August 16, 2022, from 12:00pm to 1:30pm

Location: Virtual

Welcome (12:00pm-12:05pm) Ryan Bender, Vice Chair

Treasurer's Report (12:05pm-12:10pm) Bobbie Rogers

Monkey Pox Update (12:10pm-12:30pm)

Dawd Siraj, MD, MPHTM, Infectious Disease, UW Health

Monkey Pox has been declared a public health emergency by WHO and CDC

History/background

- Discovered in 1958 and first recorded in 1970
- Double stranded DNA Virus
- Orthopoxviral genus – includes
 - Smallpox vaccinia, cowpox
- Transmission
 - Animal to human
 - Human to human
 - Fomite
- Stages
 - Incubation
 - Persons are not infectious during this stage
 - Invasion stage
 - Persons will be symptomatic – fevers, chills lymphadenopathy, headache, myalgia, arthralgia, back pain fatigue
 - Skin eruption stage
 - Infectious to others
 - Progress: macules-papules-vesicles-pustules-umbilication-ulceration and This epidemic – seeing genital lesions
 - The lesion will be prominent on the face and extremities, with this outbreak seeing genital rash

Current outbreak

- Timeline
 - April 2022 outbreak
 - July 23 International Concern by WHO
 - May 18th first case in the USA
- Most Common symptoms

- Rash, Malaise, Fever, and lymphadenopathy
- Differential diagnosis
 - Herpes Zoster
 - HSC1/2
 - Chicken pox
 - Molluscum contagiosum
 - Secondary syphilis
 - Disseminated gonorrhoea
- Whom to test interim guidance
 - Meets the clinical definition
 - Direct exposure
 - Strong suspicion for exposure
- Preferred specimen
 - skin lesion materials -preferred
 - Oropharyngeal nasal rectal swabs appropriate
 - Plasma and serum – PCR testing
- Treatment/Vaccine
 - Tecovirimate (TPOXX)
 - Widely used antiviral
 - Shown effective in animals
 - Safe in humans
 - FDA approved for smallpox – expanded access investigational for monkeypox
 - Oral and IV formulations
 - Dryvax vaccine – used to eradicate vaccine (limitation impurity of preparation, live vaccine)
 - ACAM 2000 - live vaccine, s
 - Jynneos 3rd generation highly attenuated,
 - vaccine was tested in monkey infected with monkey pox testing used to gain approval for smallpox
 - These vaccines are not new – have can use with
 - Requires 2 dose second dose 28 days later
 - Testing
- Who should receive the vaccine?
 - Direct contact for transmission
 - Presumed contact for transmission
 - Had multiple sex partners in last 14 in area with monkeypox
 - Prioritize those who are at risk for severe adverse events

- PrEP for those at high risk
- Is this a the next covid? No because
 - Declaring an emergency help to get resource in place faster
 - Not deadly, minimal person require hospitalization

Flu updates

Christine Gruetzmacher, Sanofi –

- Flu activity (deaths and hospitalization) increased in 2021 from 2020,
- Early report of high levels of flu activity in Australia in 2022
- Need to reprioritize influenza vaccination
- Need to be aware of equity and how to reach at risk populations
- supply education material available
- contact Christine Gruetzmacher Key Account Manager
 - 608-345-0880 Christine.gruetzmacher@sanofi.com
- Owen Mislant, Adult Vaccine Sales Representative
 - 262-299-7003
 - owenmislant@sanofi.com

Alison wright, Seqirus

- Flucelvax, Fluad, and Alfuria
- Review of the Australian trend over the last 20 years
 - This season early and significate season
- Review of ACIP recommendations [CDC 2021-2022 Flu Vaccination Campaign Kickoff | CDC](#)
- Contact
 - Alison.wright@seqirus.com
 - 708-205-8702

Alan Barker, GSK

- FLulaval and Fluarix
- Company goal to have a simple, seamless, reliable experience for providers
- Re-enforce the need to commit to increasing routine vaccines rate in all ages.

Tracy Ginger, AstraZeneca

- flumist could be a critical season, flumist is an alternative, quadrivalent
- Ship in Aug
- Can return 25% of product received
- Portal to submit order, flumist.com
- contact

- tracey.ginger@astrazeneca.com
- 402-297-4457

COVID Vaccine updates

Heather Hensler, Moderna

- “Start of the annual campaign for COVID” not a booster campaign
- In next couple weeks by September expecting to hear approval for bivalent and will be ready to ship
- There are publicly available information available and materials will be updated as needed
- Similar storage and handle as other Moderna COVID vaccines
- Contact
 - Heather.nesler@modernatx.com
 - 617-682-2237

Steve Ebert, Pfizer

- Comirnaty approved for 12 years and older
- Different product/vial require different preparation
- Storage and handling similar across the different products
- www.cvdvaccine-us.com
- cvdvaccine.com
- Contact
 - Steven.ebert@pfizer.com
